

06/ RIVER AND BASIN BUOY

Mounting Accessory for OILSPY Standard

Ref. 1801

The River and Basin Buoy is a mounting option for the **Standard OILSPY** hydrocarbons detector (sheet n°02).

It constantly maintains the membrane of the detector in contact with the water surface, allowing an efficient detection of floating hydrocarbons.

Its design makes this buoy well-adapted to moderate streams with water level variations such as rivers, basins and lakes.

2 Versions

Description

- 3 floats at 120° allowing a good stability of the **OILSPY** detector
- a simple mechanical structure with a quick clipping device to allow easy membrane replacements
- Ref. 1801 : 60 cm diameter
Total mass equipped: about 4.7 kg
Flottability : about 4.8 kg
- Ref. 1671a : 90 cm diameter
Total mass equipped: 5kg 370
Flottability : 10 kg

Example of a handling winch for buoy

Options

- Ref. 1675 : Handling winch for buoy 1671
- Ref. 1498a : Ferry for buoy 1671
